

Name _____

Proposal Worksheet

1. Write one observation that you are interested in exploring.
2. What is a testable question you have about the above observation?
3. What is your hypothesis about the above observation?
4. What results do you expect from your experiment?
5. List all of the materials that you need to perform this experiment. Please include the amount of each item and the size (if applicable).
6. Please give a description or outline of your experiment (3-5 sentences).

ASSESSMENT

What was your hypothesis?

What did you do to test this hypothesis?

Name _____

What were your variables?

What were your results? Is this what you thought would happen?

Did your conclusion support your hypothesis?

If you were to do your experiment again, what changes would you make?

What was the most difficult part of this activity?

If you were to do this experiment again what would you spend more time on, and why?
